which was approved October 1, 2022

No supplement or separate understanding shall modify the tariff as shown hereon.

Sheet 1 of 1 Sheets

## SCHEDULE A-24 SINGLE PHASE SERVICE

## **AVAILABILITY**

Available for all single-phase service of single character supplied at one point of delivery, subject to the established rules and regulations. This rate applies to accounting schedules 440.1 Rural; 440.3 Villages and Town Residential: 442.1 Small Commercial and RGS Rural Commercial and 445 Schools.

## CHARACTER OF SERVICE

Alternating current, 60 cycles, single phase, at available voltage.

## **RATE**

Usage Occurring in June through August

Customer Charge:

\$18.40 per month

Plus

Energy Charge:

7.999 cents per kWh

Energy Delivery Charge/Demand Charge:

\$3.75

Usage Occurring in September through May

Customer Charge

\$18.40 per month

Plus

Energy Charge:

6.899 cents per kWh

Energy Delivery Charge/Demand Charge: \$3.75

## **MINIMUM BILL**

Same as Customer Charge.

#### ENERGY COST ADJUSTMENT

Energy sales under this schedule are subject to the Energy Cost Adjustment (Schedule ECA-12).

#### TERMS OF PAYMENT

In accordance with the rules and regulations.

Sheet 1 of 2 Sheets

## **SCHEDULE B-24** THREE PHASE SERVICE

## **AVAILABILITY**

Available for all three phase general service of single character supplied at one point of delivery, subject to the established rules and regulations. This rate applies to accounting schedules 442.1 Small Commercial and RGS Rural Commercial; and 442.1 Municipal Water Pumping.

## **CHARACTER OF SERVICE**

Alternating current, 60 cycles, three phase, at available secondary voltages.

## **RATE**

Usage Occurring in June through August

Customer Charge:

\$34.00 per month

Plus

**Energy Charge:** 

8.381 cents per kWh

Energy Delivery Charge/Demand Charge: \$3.75

Usage Occurring in September through May

**Customer Charge** 

\$34.00 per month

Plus

Energy Charge:

7.281 cents per kWh

Energy Delivery Charge/Demand Charge: \$3.75

#### MINIMUM CHARGES

The minimum monthly bill shall be the highest of the following:

- 1. \$34.00 per month.
- 2. As provided in the Line Extension Policy.
- As determined in the Service Contract.

## SCHEDULE LP-22 LARGE POWER SERVICE

## AVAILABILITY

Available to consumers for all electric service of one character supplied at one point of delivery who require 50 kVA or more of transformer capacity. Not available for breakdown, standby, supplemental, resale or shared service. Motors of 10 horsepower or more must be three phase. This rate applies to accounting schedule 442.2 GL-3.

## CHARACTER OF SERVICE

Alternating current, 60 cycles, at the voltage and phase of the Company's established distribution system most available to the location of the customer.

## **RATE**

Customer Charge:

\$50.00 per month

Energy Delivery Charge/Demand Charge:

\$15.00 per kW of billing demand

per month

Energy Charge:

4.748 cents per kWh

## MINIMUM MONTHLY BILL

The minimum monthly bill shall be the higher of:

- 1. The monthly billing demand charge but not less than \$122.00, plus the customer charge;
- 2. A charge of \$1.00 per kVA of installed transformer capacity, plus the customer charge.

Additionally, where it is necessary to make unusual extensions or to reinforce distribution lines to provide service such that in the judgment of the company, the revenue to be derived from or the duration of the prospective business is not sufficient under the above stated minimum to warrant the investment, the company may require an adequate minimum bill calculated upon reasonable considerations before undertaking to supply the service.

In such cases, the consumer shall enter into a written contract with the company as to the character, amount and duration of the business offered.

(Territory to which schedule is applicable)

Replacing Schedule <u>I-12</u> Sheet <u>1</u>

which was approved March 27, 2012

No supplement or separate understanding Shall modify the tariff as shown hereon.

Sheet 1 of 3 Sheets

## SCHEDULE I-18 IRRIGATION SERVICE

## **AVAILABILITY**

Available to Members of the Cooperative located adjacent to its three-phase line for irrigation purposes, for loads of not less than 30 horsepower. This rate applies to accounting schedule 441 Irrigation.

## CHARACTER OF SERVICE

Alternating current, 60 cycles, three phase, at available voltage.

## **RATE**

Monthly Metering Charge:

\$28.99 per month (Control Option Only)

Plus

Annual Horsepower Charge:

Uncontrolled \$24.00 per connected horsepower

8-Hour Control \$0.00 per connected horsepower

Plus

Monthly Energy Charge:

Usage Occurring in June through August

8.92 cents per kWh

Usage Occurring in September through May

7.82 cents per kWh

## MINIMUM ANNUAL BILL

The Minimum Annual Bill for Uncontrolled Irrigation Services shall not be less than \$24.00 per HP of connected load. The period covered by the Minimum Annual Bill shall begin at 12:01 o'clock January 1st and end at midnight on the following December 31st. Should the customer wish to disconnect or down rate the service it is the customer's responsibility to notify the Cooperative of their intent prior to January 1st of the calendar year to avoid the Minimum Annual Bill.

## **CONTROL EQUIPMENT**

Member is responsible for the cost and installation of control equipment necessary to achieve required control.

Effective	February Month	Day	<u>2018</u> Year	Pioneer Electric Board of Trustees Perry Rubart, Secretary
Ву	Signature of C	Officer	<u>CEO</u> Title	Perint Rurant

(Name of Issuing Utility)

Entire Territory Served

(Territory to which schedule is applicable)

Replacing Schedule I-12 Sheet 2

which was approved March 27, 2012

No supplement or separate understanding shall modify the tariff as shown hereon.

Sheet 2 of 3 Sheets

## SCHEDULE I-18 IRRIGATION SERVICE (Continued)

## **METERING CHARGE**

The Monthly Metering Charge applies only to members receiving service under a control option. This charge covers the cost of additional metering necessary for this controlled service. The Monthly Metering Charge must be paid for at least 5 years. If Member moves back to uncontrolled service within 5 years, then the Member will be charged a lump sum metering payment as determined below:

60 months

- <u>Number</u> of Months Meter Charge Applied Remaining Minimum Months
- x Monthly Metering Charge Lump Sum Metering Payment

## **CONNECTED HORSEPOWER**

The connected horsepower shall be that stated by the manufacturer on the nameplate of the motor, or the sum of such ratings if more than one motor is connected for use, or at the option of the Cooperative, by proper test under conditions of maximum operating load.

## FAILURE TO CONTROL

If a Member takes action to avoid or bypass control during any time, then the Uncontrolled Annual Horsepower Charge will be applied for the calendar year in which such action takes place. The difference between the previously applicable Control Horsepower Charge and the Annual Uncontrolled Horsepower Charge will be collected from the Member during the remainder of the calendar-year's billing.

If a failure to control 1) takes place because of equipment malfunction or failure and 2) the member promptly notifies the Cooperative of such equipment malfunction or failure and 3) the failure to control did not result in additional wholesale power charges to the Cooperative, then the Cooperative may not impose the annual Uncontrolled Horsepower.

## POWER FACTOR CLAUSE

If the Customer's power factor is found by test to be less than ninety percent (90%) lagging during the period of monthly maximum demand, the demand for billing purposes shall be the measured demand increased by one percent (1%) for each one percent (1%) by which the power factor is less than ninety percent (90%).

which was approved March 27, 2012

No supplement or separate understanding shall modify the tariff as shown hereon.

Sheet 1 of 2 Sheets

## SCHEDULE ECA-22 ENERGY COST ADJUSTMENT

## **APPLICABLE**

Applicable per the provisions of the Cooperative's electric rate schedules.

## **COMPUTATION FORMULA**

The rates for energy to which this adjustment is applicable will be increased or decreased by 0.001¢ per kilowatt-hour (kWh) for each 0.001¢ (or major fraction thereof) increase or decrease in the aggregate cost of power per kWh as computed by the following formula:

$$\frac{C}{S}$$
 - B = Adjustment

Where:

- C = The actual cost of purchased power and energy for rates subject to the Energy Cost Adjustment, Account No. 555, for the latest month for which data is available.
- S = Actual sales in kWh for the same month for rates subject to the Energy Cost Adjustment.
- B = Actual power costs (purchased power and energy) in ¢/kWh sold for rates subject to the Energy Cost Adjustment during the base period. This base is 6.03¢/kWh sold, as established during the base period of January 1 through December 31, 2011.

Notwithstanding the foregoing, the Cooperative may determine that the inputs for C, S or B should be modified due to extraordinary or special circumstances.

## FREQUENCY OF COMPUTATION

This adjustment amount will be computed once each month.

Effective	December	14	2022	Attested John Jury
	Month	Day	Year	Pioneer Electric Board of Trustees
Ву	Signature of C	Officer	Title	By Secretary-Treasurer

Replacing Schedule PCA -09 Sheet

which was approved March 27, 2012

No supplement or separate understanding shall modify the tariff as shown hereon.

Sheet 2 of 2 Sheets

# SCHEDULE ECA-22 ENERGY COST ADJUSTMENT (Continued)

## SETTLEMENT PROVISION

Subsequent to the effective date of this clause, the Cooperative will maintain a continuing monthly comparison of the actual increased (decreased) cost of purchased power as shown on the books and records of the Cooperative and the increased (decreased) dollar cost of purchased power recovered from customers.

For each twelve-month billing period ending at the close of December, the cumulative difference of the monthly comparisons for the twelve-month billing period under consideration will be added to the "actual cost remainder" described below to produce a cumulative balance. The "settlement factor" will then be calculated by dividing the cumulative balance as of that date by the total number of kWh deliveries during the twelve-month period ending on that date. This amount will be rounded to the nearest  $0.001 \, \text{e/kWh}$  to determine the increase or decrease which should be made to the energy cost adjustment. This "settlement factor" will remain in effect until superseded by a subsequent "settlement factor" calculated according to this provision.

The amounts collected or returned under this "settlement factor" for each twelve-month period will be compared with the cumulative balance, as described above. Any resulting overage or underage, which will be known as the "actual cost remainder," will be applied to the next subsequent twelve-month cumulative balance for the purpose of calculating the next subsequent "settlement factor."

Sheet 1 of 2 Sheets

## SCHEDULE LI-22 LARGE INDUSTRIAL

## **AVAILABILITY**

Available to all Consumers that meet the qualifications specified herein for all electric service provided at one point of delivery.

## **QUALIFICATIONS**

The Consumer's load must maintain an average 15-minute Non-Coincidental Peak ("NCP") Demand requirement of 3,000 kW or more per month over the highest 10 months of the most recent 12 months ending with the current billing month.

The Consumer's load must also maintain an Annual NCP Load Factor that is greater than or equal to 70% for the highest 10 months of the most recent 12 months ending with the current billing month.

Load, without 12 months of prior usage/billing history, can immediately satisfy both the NCP Demand and Annual NCP Load Factor requirements using data for all available months ending with the current billing month until such time that 12 months of actual history is available, etc.

## CHARACTER OF SERVICE

At available transmission or distribution voltages determined by the Cooperative. Where service of the type desired by the Consumer is not already available at the point of delivery, additional charges under the Cooperative's line extension policy and special contract arrangements may be required prior to service being furnished.

#### **MONTHLY RATE**

which was approved January 21, 2015

No supplement or separate understanding shall modify the tariff as shown hereon.

Sheet 2 of 2 Sheets

## SCHEDULE LI-22 LARGE INDUSTRIAL (Continued)

## (4) Facilities Charge:

An additional monthly charge for the provision of distribution or transmission facilities as determined by the written agreement between the Cooperative and the Consumer. The agreement shall be submitted to the Cooperative's Board of Trustees for their approval.

## (5) Wholesale Power Cost:

The Wholesale Power Cost shall be the cost of power to serve the Consumer from the Cooperative's wholesale power supplier. The Wholesale Power Cost shall include, but not be limited to, capacity, delivery, energy and ECA (fuel and purchased power) charges for the billing period including any adjustments applied. The power cost will be calculated using the billing units defined in the same manner as defined in the wholesale rate to the Cooperative. The Consumer's billing units may be adjusted for line losses, as determined by the Cooperative, to calculate the Consumer's Wholesale Power Cost at the wholesale supplier's metering point to the Cooperative.

#### NCP BILLING DEMAND

The Consumer's NCP Billing Demand shall be the maximum kilowatt demand for the billing period as indicated or recorded during 15 consecutive minutes determined by suitable meter installed and owned by the cooperative. For purposes of establishing the Consumer's NCP Billing Demand, any electricity being supplied by a behind-the-meter distributed energy resource will be added to the maximum kilowatt demand for the billing period as previously defined. In no event shall the NCP Billing Demand be less than 3,000 kW.

## MONTHLY MINIMUM BILL

The minimum monthly bill shall be the sum of the following:

- 1. The Customer charge;
- 2. The NCP Demand charge;
- 3. The Facilities charge; and
- 4. Any minimum Wholesale Power Costs billed.

#### POWER FACTOR CLAUSE

If the Consumer's power factor is found by test to be less than ninety percent (90%) lagging during the period of monthly maximum demand, the demand for billing purposes shall be the measured demand increased by one percent (1%) for each one percent (1%) by which the power factor is less than ninety percent (90%).

## SCHEDULE SL-17A URBAN STREET LIGHTING SERVICE

## AVAILABILITY

This Schedule is FROZEN and not available for new street lighting service. Will continue to be available only for existing street lighting for all Government, Municipals, Counties, School Districts and non-Government-owned housing sub-divisions, located in the Cooperative's service territory. This schedule is not applicable to flood lighting installations, private streets, roadway or yard lighting installations for non-Government individual consumers, or to lighting for athletic fields, swimming pools, parking lots or other similar projects. This rate applies to accounting schedule 444 Street lights.

## **CHARACTER OF SERVICE**

Alternating current, 60 cycles, 120-volts.

## ANNUAL RATE PER LIGHT

For mercury and sodium lamps in fixtures hung from brackets on standard wood poles of Cooperative's general distribution system and served from overhead conductors.

MERCURY LAMPS	PER LAMP
150 Watts	\$126.72
250 Watts	175.92
400 Watts	249.84
SODIUM LAMPS	PER LAMP
100 Watts	\$ 96.94
150 Watts	126.72
250 Watts	180.48

For each steel or concrete standard installed, the annual rate will be increased by \$16.65.

## MAINTENANCE AND OWNERSHIP

Cooperative shall own and maintain the entire system and furnish lamp renewals. In the event a lamp fails and must be repaired or replaced, the Cooperative will install a LED lamp and the customer will be billed accordingly pursuant to Schedule SL-17B.

## SCHEDULE SL-17B LED STREET LIGHTING SERVICE

## AVAILABILITY

Available to all Government, Municipals, Counties, School Districts and non-Government-owned housing subdivisions, located in the Cooperative's service territory, for street lighting. This schedule is not applicable to flood lighting installations, private streets, roadway or yard lighting installations for non-Government individual consumers, or to lighting for athletic fields, swimming pools, parking lots or other similar projects. This rate applies to accounting schedule 444 Street lights.

## CHARACTER OF SERVICE

Alternating current, 60 cycles, 120-volts.

## **ANNUAL RATE PER LIGHT**

For LED lamps in fixtures hung from brackets on standard existing wood poles of Cooperative's general distribution system and served from overhead conductors; for LED lamps in fixtures on standard new wood poles; and for LED lamps in fixtures on steel poles.

<u>DEVICE TYPE</u>	<u>DEVICE DESCRIPTION</u>	PER LAMP
PA1	≈73 Watts/8,178 Lumens – Existing Wood Pole	\$ 89.16
PA2	≈73 Watts/8,178 Lumens – Dedicated Wood Pole	148.32
PA3	≈73 Watts/8,178 Lumens – Dedicated Steel Pole	164.97
PB1	≈161 Watts/16,472 Lumens – Existing Wood Pole	129.24
PB2	≈161 Watts/16,472 Lumens – Dedicated Wood Pol	e 188.52
PB3	≈161 Watts/16,472 Lumens – Dedicated Steel Pole	205.15

## MAINTENANCE AND OWNERSHIP

Company shall own and maintain the entire system.

## **HOURS OF SERVICE**

Lamps shall burn from dusk to dawn approximately 4,000 hours annually.

## **NET METERING RIDER**

#### **AVAILABILITY**

Net metering service is available under this Net Metering Rider ("Rider") at points on the Cooperative's existing electric distribution system, located within its service area, for Customers operating Renewable Energy Resources. The net metering service is available to Customer-generators on a first-come, first-served basis until the total rated generating capability of all net metering interconnections during a calendar year equals or exceeds one percent of the Cooperative's peak load for the previous calendar year. Upon reaching either of this limit, no further net metering service shall be available for that calendar year. This Rider shall not be available for any electric service schedule allowing for resale. A Customer-generator shall have the alternative option of interconnecting renewable generation under the Cooperative's Renewable Parallel Generation Rider. However, renewable Customer-generators may not change between the Net Metering and Parallel Generation Riders without the prior approval of the Cooperative, and such elections shall not be for periods less than one year.

## **APPLICABILITY**

This Rider is applicable to Customer-generators with a properly completed, signed and approved Cooperative interconnection agreement and that are taking service under the Cooperative's normal retail rate schedules. To determine total applicable net metering maximum allowed capacity, see table below:

## Total Maximum Allowed Capacity (kW)\*

For Customer with Approved Facilities

Customer Type	Operational Prior to July 1, 2014	On or After July 1, 2014
Residential	25	15
Non-Residential	200	100
Schools**	200	150

- \* The Net Metered Facility shall be appropriately sized for Customer's anticipated electric load. Cooperative will work with the Customer to determine appropriately sized units, based on historical load profiles of Customer's operations at point of interconnection.
- \*\* Any post-secondary educational institution as defined in K.S.A. 74-3201b, and amendments thereto, or any public or private school which provides instruction for students in kindergarten through 12.

Customer-generators with a Net Metered Facility operational prior to July 1, 2014 covered by this Rider may install additional renewable energy resource after July 1, 2014, as long as the pre-July 1, 2014 maximum limits are observed. Maximums listed for before and after July 1, 2014 are not additive.

## **CHARACTER OF SERVICE**

Alternating current, 60 cycles, at the voltage and phase of the Cooperative's established secondary distribution system immediately adjacent to the service location.

#### **BILLING AND PAYMENT**

Unless indicated otherwise, the Cooperative shall render a bill for net consumption at approximately 30-day intervals during the Cooperative's normal billing process.

Net consumption is defined as the kWh supplied by the Cooperative to the Customer-generator minus kWh supplied by the Customer-generator and returned to the Cooperative's grid during the billing period. Any net consumption shall be valued as follows:

To the extent the net consumption is positive (i.e. Customer-generator took more kWh from the Cooperative during the billing period than Customer-generator produced), the eligible Customer-generator will be billed in accordance with the Cooperative's standard rate for Energy Charges (for the net consumption), and for any Customer Charges, Demand Charges, and/or any Minimum Charges that would otherwise be applicable to the Customer under the standard rate.

To the extent the net consumption is negative (i.e. Customer-generator produced more kWh during the billing period than the Cooperative supplied), the Customer-generator will pay applicable Customer Charges, Demand Charges, and/or any Minimum Charges that otherwise would be applicable to the Customer under the standard rate; and the excess electric energy shall be retained by the Cooperative.

To the extent the net consumption is zero (i.e. the Customer-generator produced the same kWh during the billing period as was supplied by the Cooperative), the Customer generator will be billed in accordance with the Cooperative's otherwise applicable standard rate for the eligible Customer-generator, including any applicable Customer Charges, Demand Charges and/or Minimum Charges.

(Territory to which schedule is applicable)	
No supplement or separate understanding	
shall modify the tariff as shown hereon.	Sheet 3 of 6 Sheets
<u>Customer-generator</u> : The owner or operator of a qualified electric energy generation u (a) Is powered by a Renewable Energy Resource as defined by (b) Has a maximum electrical generating capacity as defined in A	Kansas state statutes (see definition below);

(c) Is located on a premises owned, operated, leased, or otherwise controlled by the Customer-generator;(d) Is interconnected and operates in parallel phase and synchronization with the Cooperative;

- (e) Is intended primarily to offset part or all of the Customer-generator's own electrical energy requirements; (f) Meets all applicable safety, performance, interconnection, and reliability standards established by the National
- Electrical Code, the National Electrical Safety Code, the Institute of Electrical and Electronics Engineers,
  Underwriters Laboratories, the Federal Energy Regulatory Commission, and any local governing authorities;
  and
- (g) Contains a mechanism that automatically disables the unit and interrupts the flow of electricity back onto the Cooperative's electric lines in the event that service to the Customer-generator is interrupted.

Each meter connected under this Rider defines a Customer-generator. A generator owned or operated by a Customer-generator cannot be connected in common with any other meter or be deemed to be for the purpose of serving the load connected to any other meter. To the extent that the Customer-generator controls the Renewable Energy Resources and meets the requirements and accepts all of the obligations of this Rider, the Customer-generator is not required to own the generating facilities.

#### Renewable Energy Resources:

Electrical energy produced from an energy resource or technologies defined as renewable in K.S.A. 17-4652, and amendments thereto, and energy produced from municipal or other solid waste and animal waste.

#### Net metering:

A bi-directional metering process using equipment sufficient to measure the difference between the electrical energy supplied to a Customer-generator by Cooperative and the electrical energy supplied by the Customer-generator to the Cooperative over an applicable billing period.

#### Peak load:

The one-hour maximum annual demand imposed by the Cooperative's retail load applicable to the territory to which this schedule is applicable.

## **TERMS AND CONDITIONS**

shall modify the tariff as shown hereon.

1. The Cooperative will supply, own and maintain at its expense all necessary meters and associated equipment utilized for billing. In addition, and for purposes of monitoring Customer generation and load, the Cooperative may install load research metering at its expense. The Customer shall supply, at no expense to the Cooperative, a suitable location for meters and associated equipment used for billing and for load research. Such equipment shall be accessible at all times to Cooperative personnel.

Sheet 4 of 6 Sheets

- 2. The Cooperative shall have the right to require the Customer, at certain times and as electric operating conditions warrant, to limit the production of electrical energy from the generating facility to an amount no greater than the load at the Customer's facility of which the generating facility is a part.
- 3. The Customer shall furnish, install, operate and maintain in good order and repair without cost to the Cooperative such relays, locks and seals, breakers, automatic synchronizers, disconnecting devices, and other control and protective devices as shall be designated by the Cooperative as being required as suitable for the operation of the generator in parallel with the Cooperative's system.
- 4. The Customer shall install and maintain a visible, manual disconnect switch. This manual switch must have the capability to be locked out by Cooperative personnel to isolate the Cooperative's facilities in the event of an electrical outage on the Cooperative's transmission and distribution facilities serving the Customer. This isolating device shall also serve as a means of isolation for the Customer's equipment during any Customer maintenance activities, routine outages or emergencies. The Cooperative shall give notice to the Customer before a manual switch is locked or an isolating device used, if possible; and otherwise shall give notice as soon as practicable after locking or isolating the Customer's facilities.
- 5. The Customer shall reimburse the Cooperative for any equipment, facilities, protective equipment or upgrades required solely as a result of the installation by the Customer of generation in parallel with the Cooperative's system.
- 6. The Customer shall notify the Cooperative prior to the initial energizing and start-up testing of the Customerowned generator, and the Cooperative shall have the right to have a representative present at said test.
- 7. If harmonics, voltage fluctuations, or other disruptive problems on the Cooperative's system are directly attributable to the operation of the Customer's system, such problem(s) shall be corrected at the Customer's expense.

- 8. No Customer's generating system shall damage the Cooperative's system or equipment or present an undue hazard to Cooperative personnel. The Cooperative shall not be liable directly or indirectly for permitting or continuing to allow an attachment of a net metered facility or for the acts or omissions of a Customer-generator that cause loss or injury, including death, to any third party. The Customer-generator agrees to hold the Cooperative harmless from injury or property damage incurred by any person and arising out of the ownership, operation, maintenance, or use of the Customer's electrical generation facility and to indemnify the Cooperative against all liability and expense related thereto.
- 9. Prior to installing and interconnecting a Renewable Energy Resource the Customer shall enter into a standard interconnection contract with the Cooperative setting forth the conditions related to technical and safety aspects of parallel generation.
- 10. Service under this Rider is subject to the Cooperative's Parallel Generation Interconnection Regulations found in the Cooperative's approved rules and regulations and subsequent modifications thereto.
- 11. The Customer-generator shall, at its own expense, maintain in force general liability insurance without any exclusion for liabilities related to the interconnection. The amount of such insurance shall be sufficient to insure against all reasonably foreseeable direct liabilities given the size and nature of the generating equipment being interconnected, the interconnection itself and the characteristics of the system to which the interconnection is made. For Renewable Energy Resource systems having a maximum nameplate generating capability of 10 kW or less, a Customer-generator whose system meets the standards specified in Cooperative's Parallel Generation Interconnection Regulations found in the Cooperative's approved rules and regulations shall not be required to install additional controls, perform or pay for additional tests or distribution equipment or purchase additional liability insurance other than such general liability insurance. For Renewable Energy Resource systems having a maximum nameplate generating capability of greater than 10 kW, the Cooperative's Parallel Generation Interconnection Regulations found in the Cooperative's approved rules and regulations shall: (1) Set forth safety, performance and reliability standards and insurance requirements; and (2) establish the qualifications for exemption from a requirement to install additional controls, perform or pay for additional tests or distribution equipment or purchase additional liability insurance.

## PARALLEL GENERATION RIDER - QUALIFYING FACILITY

## **AVAILABILITY**

Service is available under this Parallel Generation Rider – Qualifying Facility ("Rider") at points on the Cooperative's existing electric distribution system, located within its service area, for Parallel Generation Service Customers ("PGS Customers") operating Qualifying Facilities (both renewable and non-renewable). Service under this Rider is not applicable to standby or resale electric service.

## **APPLICABILITY**

This Rider is applicable to PGS Customer-generators with a properly completed, signed and approved Cooperative interconnection agreement and that is taking service under the Cooperative's normal retail rate schedules. This Rider is applicable where the nameplate capability of the PGS Customer's electrical generating system is appropriately sized and exceeds 200 kW.

## **CHARACTER OF SERVICE**

Alternating current, 60 cycles, at the voltage and phase of the Cooperative's established secondary distribution system immediately adjacent to the service location.

#### **BILLING AND PAYMENT**

Unless indicated otherwise, the Cooperative shall render a bill for consumption at approximately 30-day intervals during the Cooperative's normal billing process. Billing by the Cooperative to the PGS Customer shall be in accordance with the applicable retail rate schedule.

For electrical energy generated that exceeds the PGS Customer's instantaneous load and delivered by the PGS Customer to the Cooperative from the PGS Customer's Qualifying Facility, the Cooperative shall pay 100% of the Cooperative's monthly system average cost of energy per kilowatt hour as billed to the Cooperative under the Cooperative's wholesale power supplier's Energy Cost Adjustment (ECA) filing for the period(s) in which energy was delivered to the Cooperative. At Cooperative's discretion, such amount shall be credited to PGS Customer's account or paid at least annually.

Any electric energy generated that exceeds the PGS Customer's instantaneous load and delivered by the PGS Customer to the Cooperative from the Qualifying Facilities in excess of the appropriate generator sizing (load), the Cooperative may, at its sole option, pay 100% of the Cooperative's monthly system average cost of energy per kilowatt hour as billed to the Cooperative under the Cooperative's wholesale power supplier's Energy Cost Adjustment (ECA) filing for the period(s) in which energy was delivered to the Cooperative. At Cooperative's discretion, such amount shall be credited to PGS Customer's account or paid at least annually.

#### **DEFINITIONS**

#### PGS Customer-generator:

The owner or operator of a qualified electric energy generation unit which:

- (a) Is powered by a "Qualifying Facility" for co-generation or small power production as defined in Subpart B of the Public Utility Regulatory Policies Act of 1978 (PURPA), and 18 CFR Part 292;
- (b) Is located on a premises owned, operated, leased, or otherwise controlled by the PGS Customer-generator;
- (c) Is interconnected and operates in parallel phase and synchronization with the Cooperative;
- (d) Is appropriately sized for the PGS Customer-generator's anticipated electric load;
- (e) Meets all applicable safety, performance, interconnection, and reliability standards established by the National Electrical Code, the National Electrical Safety Code, the Institute of Electrical and Electronics Engineers, Underwriters Laboratories, the Federal Energy Regulatory Commission, and any local governing authorities; and (f) Contains a mechanism that automatically disables the unit and interrupts the flow of electricity back onto the Cooperative's electric lines in the event that service to the PGS Customer-generator is interrupted.

Each meter connected under this Rider defines a PGS Customer-generator. A generator owned or operated by a PGS Customer-generator cannot be connected in common with any other meter or be deemed to be for the purpose of serving the load connected to any other meter. To the extent that the PGS Customer-generator controls the Qualifying Facility and meets the requirements and accepts all of the obligations of this Rider, the PGS Customer-generator is not required to own the generating facilities.

## **TERMS AND CONDITIONS**

- 1. The Cooperative will supply, own and maintain at its expense all necessary meters and associated equipment utilized for billing. In addition, and for purposes of monitoring PGS Customer generation and load, the Cooperative may install load research metering at its expense. The PGS Customer shall supply, at no expense to the Cooperative, a suitable location for meters and associated equipment used for billing and for load research. Such equipment shall be accessible at all times to utility personnel.
- The Cooperative shall have the right to require the PGS Customer, at certain times and as electric operating
  conditions warrant, to limit the production of electrical energy from the generating facility to an amount no
  greater than the load at the PGS Customer's facility of which the generating facility is a part.

## PARALLEL GENERATION RIDER - RENEWABLE

## **AVAILABILITY**

hall modify the tariff as shown hereon.

Service is available under this Parallel Generation Rider – Renewable ("Rider") at points on the Cooperative's existing electric distribution system, located within its service area, for Parallel Generation Service Customers ("PGS Customers") operating Renewable Energy Resources. The service is available to PGS Customergenerators on a first-come, first-served basis until the total rated generating capability of all interconnections under this Rider equals or exceeds four percent of the Cooperative's peak load for the previous calendar year. Upon reaching this limit, no further service shall be available for that calendar year. This Rider shall not be available for any electric service schedule allowing for resale. A qualifying PGS Customer-generator shall have the alternative option of interconnecting renewable generation under the Cooperative's Net Metering Rider. However, renewable PGS Customer-generators may not change between the Net Metering and Parallel Generation – Renewable Riders without the prior approval of the Cooperative, and such elections shall not be for periods less than one year.

## **APPLICABILITY**

This Rider is applicable to PGS Customer-generators with a properly completed, signed and approved Cooperative interconnection agreement and that are taking service under the Cooperative's normal retail rate schedules. This Rider is not applicable where the nameplate capability of the PGS Customer's electrical generating system exceeds the lesser of the PGS Customers appropriately sized electric load or 25 kilowatts (kW) for residential PGS Customers or 200 kW for commercial PGS Customers.

#### CHARACTER OF SERVICE

Alternating current, 60 cycles, at the voltage and phase of the Cooperative's established secondary distribution system immediately adjacent to the service location.

#### **BILLING AND PAYMENT**

Unless indicated otherwise, the Cooperative shall render a bill for consumption at approximately 30-day intervals during the Cooperative's normal billing process. Billing by the Cooperative to the PGS Customer shall be in accordance with the applicable retail rate schedule.

For electrical energy generated that exceeds the PGS Customer's instantaneous load and delivered by the PGS Customer to the Cooperative from the Renewable Energy Resource, the Cooperative shall pay 150% of the Cooperative's monthly system average cost of energy per kilowatt hour as billed to the Cooperative under the Cooperative's wholesale power supplier's Energy Cost Adjustment (ECA) filing for the period(s) in which energy was delivered to the Cooperative. At Cooperative's discretion, such amount shall be credited to PGS Customer's account or paid at least annually.

TERMS AND CONDITIONS	

- 1. The Cooperative will supply, own and maintain at its expense all necessary meters and associated equipment utilized for billing. In addition, and for purposes of monitoring PGS Customer generation and load, the Cooperative may install load research metering at its expense. The PGS Customer shall supply, at no expense to the Cooperative, a suitable location for meters and associated equipment used for billing and for load research. Such equipment shall be accessible at all times to Cooperative personnel.
- 2. The Cooperative shall have the right to require the PGS Customer, at certain times and as electric operating conditions warrant, to limit the production of electrical energy from the generating facility to an amount no greater than the load at the PGS Customer's facility of which the generating facility is a part.
- 3. The PGS Customer shall furnish, install, operate and maintain in good order and repair without cost to the Cooperative such relays, locks and seals, breakers, automatic synchronizers, disconnecting devices, and other control and protective devices as shall be designated by the Cooperative as being required as suitable for the operation of the generator in parallel with the Cooperative's system.
- 4. The PGS Customer shall install and maintain a visible, manual disconnect switch. This manual switch must have the capability to be locked out by Cooperative personnel to isolate the Cooperative's facilities in the event of an electrical outage on the Cooperative's transmission and distribution facilities serving the Customer. This isolating device shall also serve as a means of isolation for the PGS Customer's equipment during any PGS Customer maintenance activities, routine outages or emergencies. The Cooperative shall give notice to the PGS Customer before a manual switch is locked or an isolating device used, if possible; and otherwise shall give notice as soon as practicable after locking or isolating the PGS Customer's facilities.
- 5. The PGS Customer shall reimburse the Cooperative for any equipment, facilities, protective equipment or upgrades required solely as a result of the installation by the PGS Customer of generation in parallel with the Cooperative's system.
- 6. The PGS Customer shall notify the Cooperative prior to the initial energizing and start-up testing of the PGS Customer-owned generator, and the Cooperative shall have the right to have a representative present at said test.
- 7. If harmonics, voltage fluctuations, or other disruptive problems on the Cooperative's system are directly attributable to the operation of the PGS Customer's system, such problem(s) shall be corrected at the PGS Customer's expense.

# SCHEDULE <u>LP-TOU-21</u> Replacing Schedule LP<u>-TOU-21</u> Sheet <u>1</u>

# Pioneer Electric Cooperative, Inc.

(Name of Issuing Utility)

## **Entire Territory Served**

(Territory to which schedule is applicable)

which was approved March 27, 2012

No supplement or separate understanding shall modify the tariff as shown hereon.

Sheet 1 of 3 Sheets

# SCHEDULE LP-TOU-21 LARGE POWER - TIME-OF-USE (EXPERIMENTAL)

# **APPLICABILITY**

This optional rate is restricted initially to ten (10) customers. The rate is predicated on the Cooperative's wholesale supplier maintaining the existing coincident peak billing methodology. If this methodology is changed in the future, changes in this rate may be required.

#### **AVAILABILITY**

This rate is available to all customers served under the Cooperative's Large Power Service rate, Schedule LP-09, who have exhibited monthly peak demands of 200 kW or more for at least three (3) months of the last twelve (12) months. Not available for breakdown, standby, supplemental, resale, or shared service.

# CHARACTER OF SERVICE

Alternating current, 60 cycles, at the voltage and phase of the Cooperative's established distribution system most available to the location of the Customer.

#### **RATE**

Customer Charge:

\$50.00 per month

Demand Charge:

Maximum Actual Demand:

\$4.35 per kW per month

Plus

On-peak Hours Billing Demand:

\$7.37 per kW per month

**Energy Charge** 

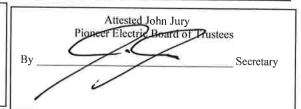

5.50 cents per kWh

#### MINIMUM MONTHLY BILL

The minimum monthly bill shall be the following:

- 1. A charge of \$1.00 per kVA of installed transformer capacity, plus the customer charge.
- 2. Additionally, where it is necessary to make unusual extensions or to reinforce distribution lines to provide service such that, in the judgment of the Cooperative, the revenue to be derived from, or the duration of the prospective business, is not sufficient under the above-stated minimum to warrant the investment, the Cooperative may require an adequate minimum bill calculated upon reasonable considerations before undertaking to supply the service. In such cases, the Customer shall enter into a written contract with the Cooperative as to the character, amount, and duration of the business offered.

# SCHEDULE <u>LP-TOU-21</u> Replacing Schedule LP-TOU-21 Sheet 2

which was approved March 27, 2012

No supplement or separate understanding shall modify the tariff as shown hereon.

Sheet 2 of 3 Sheets

# SCHEDULE LP-TOU-21 LARGE POWER - TIME-OF-USE (EXPERIMENTAL) (Continued)

# DETERMINATION OF MAXIMUM ACTUAL DEMAND

The Customer's maximum actual demand shall be the maximum rate at which energy is used for any period of fifteen (15) consecutive minutes of the month for which the bill is rendered, as shown by the Cooperative's meter.

# **DETERMINATION OF ON-PEAK HOURS BILLING DEMAND**

The Customer's on-peak hours billing demand shall be the maximum rate at which energy is used for any period of thirty (30) consecutive minutes, as shown by the Cooperative's meter during the time period beginning with 10 A.M. through 10 P.M. local time.

### **SPECIAL CONDITIONS**

The purpose of the proposed time-of-use rate is to promote the efficient use of energy by encouraging the Customer to shift consumption from on-peak periods to off-peak periods. In order to ensure that customers taking service pursuant to this tariff do not increase the Cooperative's purchased demand costs, the hours of availability of service are necessarily limited. The Cooperative recognizes that there may be times when, due to operational problems or equipment outages, the Customer may need to operate during the on-peak period. The Cooperative will permit the Customers to operate during on-peak periods without imposing an on-peak billing demand charge during periods following operational problems under the following conditions:

- 1. The Customer shall assume all risk that the Cooperative's purchased demand costs are increased as a result of Customer's usage during the on-peak period;
- 2. The increase in the Cooperative's purchased demand cost shall be determined by subtracting from actual purchased demand cost for the month, the purchased demand costs that would have otherwise been incurred by the Cooperative if the Customer had not operated during the on-peak time;
- 3. Any increase in the Cooperative's purchased demand cost so determined shall be added to the Customer's regular billing for the month; and
- 4. Availability of service pursuant to these special conditions shall be limited to no more than four (4) occurrences during any calendar year.

### RENEWABLE ENERGY PROGRAM RIDER

#### **AVAILABILITY**

Service is available under this Rider at points on the Cooperative's existing electric distribution system, located within its service area, for Customers taking service under the Cooperative's standard service rate schedule and as applicable and pursuant to the qualifications provided herein. Notwithstanding the foregoing, this Rider shall not be available to Customers taking service under Cooperative's Irrigation Service or Street Lighting Service schedules or to Customers with self-generation that require standby, backup, breakdown or supplemental service.

#### **CHARACTER OF SERVICE**

As is available, Cooperative will offer to Customer energy from renewable resources and associated renewable energy credits in an amount equal to the level of service purchased by Customer taking service under this Rider. Energy output from renewable resources will vary from month-to-month due to weather and other factors, and in some months participating Customers may not receive the full amount of participation energy associated with their selected Participation Level.

## **DIVISIONS, TIERS, AND PARTICIPATION LEVELS**

Service under this Rider is available under either the wind Division or the solar Division. Three Tiers are available under each Division. The qualifications and cost structure for each Division and the associated Tiers are uniquely defined herein. Customers that meet the qualifications for a given Division and Tier may select a Participation Level ranging from a minimum of 25% of their total energy consumption to a maximum of either 100% of their total energy (kWh) consumption or the Tier Participant Cap, whichever is greater.

(Territory to which schedule is applicable)

No supplement or separate understanding hall modify the tariff as shown hereon.

Sheet 2 of 6 Sheets

### **QUALIFICATIONS AND LIMITATIONS**

Service under this Rider is subject to qualifications and limitations as described below.

The Minimum Size qualification for all tiers, excluding Solar Division Tier 1b – Residential Community Solar, is determined by the Customer's average hourly demand (kW) from the previous 12 months. Participation in Solar Division Tier 1b shall be at least 1 (125 kWh) share. The Minimum Size qualification is evaluated when a customer requests service under the Rider to determine initial eligibility. The Minimum Size qualification is subsequently evaluated at the beginning of each calendar year to determine ongoing eligibility.

The Tier Participant Cap is a not-to-exceed monthly limit for maximum participation (kWh/month) by individual Customers in the Renewable Energy Program. The Tier Participant Cap is effective each month that a Customer is taking service under the Rider.

The Total Tier Cap is a not-to-exceed monthly limit for maximum participation (kWh/month) by all Customers participating in a given Tier. The Total Tier Cap is evaluated each time a Customer initially requests service under the Rider. The evaluation is performed by summing the maximum monthly participation energy (MWh/month) from the previous 12 months for all Customers participating in a given Tier with the anticipated maximum monthly hourly participation energy for the Customer that is requesting service under the Rider based on that Customer's maximum monthly energy usage from the previous twelve months multiplied by the requested level of participation.

Renewable Energy Credits will not be available to Customers participating in Solar Division Tier 1b - Residential Community Solar.

Wind Division Tier 1 -

Minimum Size = 100 kW

Tier Participant Cap = 1,500,000 kWh/month

Total Tier Cap = 8.000.000 kWh/month

Wind Division Tier 2 -

Minimum Size = 200 kW

Tier Participant Cap = 3,000,000 kWh/month

Total Tier Cap = 16,000,000 kWh/month

Wind Division Tier 3 -

Minimum Size = 1,000 kW

Tier Participant Cap = None\* Total Tier Cap = None\*

Replacing Schedule \_23-RE

Which was filed \_June 1, 2023

Entire Territory Served (Territory to which schedule is applicable)

No supplement or separate understanding shall modify the tariff as shown hereon.

Sheet 4 of 6 Sheets

Wind Division Tier 1: Renewable Energy Charge will be \$0.0025/kWh. The Renewable Energy Charge will be in addition to all other applicable charges under the applicable rate schedule for standard service to the Customer.

Wind Division Tier 2: Renewable Energy Charge will be the average energy charge associated with energy received in a given month from Cooperative's wholesale power provider's wind purchase power agreements in effect as of 1/1/2020. The Renewable Energy Charge, in combination with revenue earned from selling participation energy into the SPP Integrated Marketplace, will be used to calculate a modified Energy Cost Adjustment as described in each participating Customer's service agreement. All other applicable charges under the applicable rate schedule for standard service to the Customer will apply.

Wind Division Tier 3: Renewable Energy Charge will be the average energy charge associated with energy received in a given month from the Cooperative's wholesale power provider's wind purchase power agreement associated with the Customer's Tier 3 Service Agreement. The Renewable Energy Charge, in combination with revenue earned from selling participation energy into the SPP Integrated Marketplace, will be used to calculate a modified Energy Cost Adjustment as described in each participating Customer's service agreement. All other applicable charges under the applicable rate schedule for standard service to the Customer will apply.

Solar Division Tier 1a: Renewable Energy Charge will be \$0.0035/kWh. The Renewable Energy Charge will be in addition to all other applicable charges under the applicable rate schedule for standard service to the Customer.

Solar Division Tier 1b – Residential Community Solar: The monthly Renewable Energy Charge will be \$4.00 per each 125 kWh share. The monthly Renewable Energy Adjustment will be equal to the total monthly revenue earned by the Johnson Corner Solar Project from selling energy into the SPP Integrated Marketplace divided by the total energy (kWh) produced by the Johnson Corner Solar Project during the month multiplied by 125 multiplied by the total number of subscription shares. The Renewable Energy Charge and Renewable Energy Adjustment will be in addition to all applicable charges under the applicable rate schedule for standard service to the Customer.

Solar Division Tier 2: Renewable Energy Charge will be the average energy charge associated with energy received in a given month from the Cooperative's wholesale power provider's solar purchase power agreements in effect as of 1/1/2020. The Renewable Energy Charge, in combination with revenue earned from selling participation energy into the SPP Integrated Marketplace, will be used to calculate a modified Energy Cost Adjustment as described in each participating Customer's service agreement. All other applicable charges under the applicable rate schedule for standard service to the Customer will apply.

Sheet 5 of 6 Sheets

Solar Division Tier 3: Renewable Energy Charge will be the average energy charge associated with energy received in a given month from the Cooperative's wholesale power provider's solar purchase power agreement associated with the Customer's Tier 3 Service Agreement. The Renewable Energy Charge, in combination with revenue earned from selling participation energy into the SPP Integrated Marketplace, will be used to calculate a modified Energy Cost Adjustment as described in each participating Customer's service agreement. All other applicable charges under the applicable rate schedule for standard service to the Customer will apply.

#### **SERVICE AGREEMENT**

All Customers taking service under this Rider, excluding Customers taking service under Solar Division Tier 1b – Residential Community Solar, will be required to enter into a three-party service agreement between Cooperative's, Cooperative's wholesale power provider, and the Customer. The service agreement will define the Customer's selected Division, Tier, and Participation Level. The term of the agreement will be determined between the parties, but the term shall be no less than one year for service under Tiers 1 and 2, except for Solar Division Tier 1b – Residential Community Solar. Tier 3 service agreements shall include exit fee provisions to protect against stranded investment if a Customer leaves prior to the expiration of any new power supply arrangement entered into by Cooperative's wholesale power provider to serve the Customer per the terms of this Rider.

All residential Customers taking service under Solar Division Tier 1b – Residential Community Solar will be required to enter into a written service agreement with the Cooperative. A residential Customer may terminate service under the service agreement and this Rider at any time, but if terminated, Customer will be prohibited from signing up for service under this Rider again for a period of one year.

#### ADDITIONAL TERMS AND CONDITIONS

- 1. Certification of renewable energy purchased under this Rider will be delivered to the Customer, excluding Customers taking service under Solar Division Tier 1b Residential Community Solar.
- 2. Service under Tiers 1 and 2 is subject to adjusted Participation Levels if the total amount of participation energy in a given month exceeds 50% of the total renewable energy produced by Cooperative's wholesale power provider's renewable energy resources.
- 3. Service under Tier 3 will not be available until the aggregate participation level requested reaches a threshold sufficient for Cooperative's wholesale power provider to justify pursuing a new renewable resource, as determined by Cooperative's wholesale power provider.
